

Route Kansas Emergency Repair Project Video

Video shots already obtained:

MEETING IN Lopare – attended by MND(N) commander, VRS & Federation generals, VRS & Federation engineer officers, and mayors of towns along Route Kansas.

- MND(N) engineer officer facilitating briefing.
- EAF engineer officers giving situation briefings.
- Mayors asking questions or pledging materials support to project.
- VRS & Federation generals talking as meeting breaks up.

ALONG Route Kansas –

- View through up-armored HMMWV windshield of route.
- Federation army crew clearing drainage ditch.
- Engineer SEE (Small Emplacement Excavator) being backed into road.
- Shot of condition of roadway.

BRIDGE K21 –

- Shot of broken timber under bridge (poor, underexposed, should be re-shot.)
- Bridge, from above.
- Bridge, as truck crosses it.

SHOTS NEEDED FOR VIDEO PROJECT:

- Supplies being delivered.
- MND(N) engineering assistance (Surveying, building plans development, soil testing, advice/mentoring, etc.)
- RS army work crews.
- ANY shots of VRS/Federation armies “cooperating” together on a task.
- Bridge construction (with lots of bodies and heavy equipment, if possible.)
- Road re-grading (repairing downslope slides & undermining,) and re-surfacing (asphalt or gravel.)
- Trucks driving on narrow, dangerous parts of route (emphasize narrow spots or spots where trucks drive over undermined pavement or past downslope landslides.)
- Private autos on dangerous parts of route (emphasize how family cars would be trapped if route fails.)
- Same types of shots above, but on mountain roads in good repair (show how good roads facilitate free movement of people and goods.)
